Patient Data Impact Assessment	Not Applicable
Equality Analysis / Human Rights Assessment completed	Not Applicable

Executive Summary

The Heywood & Middleton Leg was held at the Masonic Lodge Middleton on the 12th November 2019.

There were two presentations:

Single Access Point for Work and Skills Opportunities

This was a scheme to help improve patients' lives who are on certain types of benefit who would benefit from extra support and skills in helping them find a job. This would help them physically and mentally and reduce the number of visits which were needed to Primary Care for the issuing of Fit notes. Details about how to access the scheme was also given.

Organisation of Review of Care and Health Applications

The CCG have commissioned a service which support health related app library for HMR. There are many apps available but ORCHA helped to make sure that the apps are genuine and are reviewed to make sure that they meet the appropriate standards. The accountability of the apps lies with ORCHA or the developer.

Meeting

Members were advised to make sure that they completed their declaration of interest training and the annual declaration of interests.

Members were asked about feedback from the papers. Members noted the papers and clarification was sought when required.

CPAP

Feedback was given regarding the October 2019 CPAP workshop. The main issues raised were about Secondary Care asking Primary Care to carry out their investigations. The issue of 'your test your responsibility' was mentioned. The key factors in this was the lack of resources in Primary Care and the interpretation of the result and its significance especially when the tests which were requested by Secondary care were not common tests. This has been highlighted as an issue of DATIX as a key area and this would be fed back to the Primary and Secondary Care Interface Group.

CPAP Workshop

Members were asked to feedback about Prescribing for the December CPAP. The following themes came out from the CPAP feedback.

- a) Phlebotomy – Secondary Care especially for Bloods with regards to medications

- b) Shared Care Protocols
- c) Feno Testing
- d) Out of Stock Medications
- e) Communication around prescribing issues such as the flu vaccine
- f) Optimise Rx
- g) Over the Counter Medications
- h) PCN Pharmacists and Schemes
- i) Prescribing in Core Plus

Members received updates about the Urgent Care Review and from the Executive Team.
